

Animals: Ethics, Rights & Law—A Bibliography

By Patrick S. O'Donnell (2006)
Department of Philosophy
Santa Barbara City College

This bibliography is not exhaustive, however, at least with regard to books, it well represents what is more or less available. I have included only a comparatively few number of journal articles, being far more selective here in order to keep the list manageable (less than 500 entries). Indeed, also toward that end—with a few exceptions—I chose ‘about 1980’ as an arbitrary cut-off date (thus one should not assume anything before that period is somehow without merit). Should you know of a book or article conspicuous by its absence (i.e. you’re fairly convinced of its high quality), please let me know: patrickseamus@hotmail.com. Some of the titles do not, strictly speaking, fall within the categories of ethics, rights, and law. In such cases, I’ve included them either because they touch upon presuppositions, assumptions or premises essential to this or that argument found in the literature, or, they are exceptionally lucid with respect to a subsidiary topic within animal ethics, rights, and law. Finally, the bulk of this list would not have been possible without the excellent bibliography in Angus Taylor’s wonderful book, *Animals and Ethics: An Overview of the Philosophical Debate* (2003).
